

No-Sew Fleece Blanket, Toddler to Teen

PLEASE USE SINGLE THICKNESS OF FLEECE FOR THIS PATTERN

Supplies: Fleece material (see below)
Sharp scissors
6" Square ruler

Fabric Requirements: **Toddler/Child Size:**

1 $\frac{3}{8}$ yards (approx 48-50") of 58-60" wide fleece for a finished size of approximately 44" x 54", including fringe

Teen Size:

1 $\frac{3}{4}$ yards (approx 63-65") of 58-60" wide fleece for a finished size of approximately 59" x 54", including fringe

NOTE: The above sizes are used to help maximize the fabric and minimize any waste.

Cutting Instructions: Lay fleece out flat on a table. With a nice straight cut, trim off selvages (the rough, machine-finished, edges on both sides). Using your ruler as a guide, cut a **6"x 6" square** out of each corner (see diagram). To make fringe, **cut 6" long strips** (using your ruler as a guide) at **1" intervals** all the way around the outside edge. Long, smooth cuts give a cleaner look.

Knot-Tying Instructions: Start in one corner and **gently** tie an overhand knot in each strip, sliding it up to and even with the blanket's edge to create a finished fringe edge. (To make the knot, cross the end of the strip over itself to form a loop—bring the end up through the loop—and pull.) Being **gentle** as you tie will produce smoother edges of the blanket itself.

Instructions included for those wishing to make this pattern at home.
